strips: $g_{\min}(\sigma)$ (numerical)
log law under $K_\Lambda \le 1$ (t optimal)
no deep valleys, $\Lambda_* = 1.87$ (τ optimal)
$g = (\kappa - R)/\sigma$ and lower bounds
10^0
10^{-1}
10^{-2}
10^1
10^2
$\ln(1/\sigma)$
